Business Responsibility and Sustainability Report

Infosys has always placed sustainability at the heart of its business approach. Our ability to fulfill and exceed our responsibilities to our stakeholders is a testament to our commitment. We have balanced our business success with an unwavering focus on exemplary corporate governance and responsiveness to the needs of the environment and society. As an early proponent of responsible business, we readily embraced our commitment to integrate Environmental, Social and Governance (ESG) factors into our operations. We adopted the GRI Framework in 2008 and in fiscal 2013, we were among the first companies to publish the Business Responsibility Report (BRR).

The BRSR follows the National Guidelines on Responsible Business Conduct (NGRBC) principles on the social, environmental and economic responsibilities of business.

Our BRSR includes our responses to questions about our practices and performance on key principles defined by Regulation 34(2)(f) of the SEBI (Listing Obligations and Disclosure Requirements) Regulations 2015 as amended from time to time, which cover topics across all ESG dimensions.

In line with our strategy, our Health, Safety and Environmental Management System (HSEMS) at all India locations is certified to ISO 45001:2018 standard. HSEMS is implemented at all our overseas locations based on legal requirements / internal benchmarks and have also included them in the internal audits cycle. We have established numerous interventions to address occupational health-related topics such as emotional well-being, mental health, ergonomics, safety, lifestyle diseases and more. Well-equipped occupational health centers are available at all our campuses in India. During the year, doctors and physiotherapists have helped employees and their families through virtual consultations leveraging our telemedicine portal. More details on Occupational Health and Safety are available on our website at https://www.infosys.com/about/corporate-responsibility/social/employee-wellbeing/occupational-health-safety.html.

We proactively identify occupational health and safety risks, for all existing / new / modified activities, processes, products or services, and regulatory changes, including routine and non-routine activities. Risk assessment includes quarterly evaluation of incidents that have occurred. Hazardous conditions, if any, are identified and prioritized for elimination and control. Once the identified hierarchy of controls is implemented, the risk assessment is revisited to assess the residual risks. As Infosys is an IT / ITES company, there are no product risks, but there are risks associated with the provision of services such as ergonomics at work and those associated with the operation of utilities and employees' commute. Participation and consultation with relevant personnel involved in the activities is ensured during the risk assessments. Risks are also assessed before and after the development of new buildings. Experience from previous projects and ongoing operations is also considered. We continually monitor our construction sites where infrastructure is being built. More details on Occupational Health and Safety are available on our website at https://www.infosys.com/about/corporate-responsibility/social/employee-wellbeing/occupational-health-safety.html.

The Company has implemented the following measures to ensure a safe and healthy workplace:

Being an IT / ITES company, the prevalent risks include ergonomics, Musculoskeletal Disorders (MSDs), emotional well-being, etc., associated with the workplace, operation of utilities, and commute. Numerous initiatives, interventions, engagement virtual sessions, and process controls are in place to address these risks.

Infosys has been carbon neutral since fiscal 2020 across Scope 1, 2 and 3 emissions. Our approach to carbon neutrality is based on reducing and avoiding emissions through energy efficiency and renewable energy. Energy efficiency is achieved through super-efficient new buildings, industry-leading Energy Performance Index (EPI) <65 kWh/m2-yr, real-time monitoring and optimization of building operations through smart building systems, and retrofits in existing buildings. Infosys has implemented several retrofit projects (across air conditioning, lighting, and UPS systems) in the past and achieved a connected electrical load reduction of 36 MW across campuses in India. In 2025, we have undertaken a retrofit project to replace direct FCU units with chilled water units of air conditioning, which saved 1.3 lakh kWh and reduced emissions by 94.72 tCO_2e. To achieve our goal of transitioning to clean energy, we have installed 60 MW of solar PV capacity.

10. Briefly describe the waste management practices adopted in your establishments. Describe the strategy adopted by your company to reduce usage of hazardous and toxic chemicals in your products and processes and the practices adopted to manage such wastes.

The 5R principle –' Refuse, Reduce, Reuse, Refurbish / Repurpose and Recycle' – forms the foundation of Infosys' waste management strategy. Through our efforts, we turn waste into resources and thus support a circular economy. Infosys has adopted a comprehensive waste management practice which involves collection, sorting and disposal of waste. Waste management practices at Infosys include source segregation, secondary segregation, effective waste processing and collection, recycling and efficient disposal of all waste in accordance with relevant laws. This helps reduce negative impacts on the environment.

We seek to uphold our ambition of 'zero waste to landfill' through active minimization combined with technological investment in recycling and streamlining of systems and processes. Infosys is pursuing the goal of zero waste to landfill at all of its own sites by 2030, utilizing the TRUE Certification for Zero Waste, provided by Green Business Certification Inc. TRUE Certification requires a facility to divert at least 90% of its waste from landfill, incineration (waste-to-energy), and the environment. Using TRUE's portfolio approach, Infosys has earned TRUE Certification for three campuses last year, and is committed to achieving certification for seven of its owned campuses in fiscal 2026 and subsequently will embark on the certification for the rest of the owned locations.

The e-waste is disposed to authorized refurbishers, recyclers who issue us certificates for successful recycling and recovery of the material. These are established with a focus on adhering to principles of circularity. Other hazardous waste such as biomedical waste, oil-soaked cotton, oil filters from DG sets, and other trash are designated by the Central Pollution Control Board (CPCB) and the State Pollution Control Board (SPCB). These agencies incinerate the waste in compliance with the rules and regulations. The resulting ash is used in some places for the manufacture of cement and is sent for Treatment, Storage, Disposal Facility (TSDF) landfills for safe disposal.

Infosys has a Business Continuity Management System (BCMS) called Phoenix, certified by ISO 22301:2019 Security and Resilience – Business Continuity Management Standard. This program is designed to ensure seamless continuity of business and the utmost safety of our employees and assets while continuously meeting client expectations. The BCMS program provides a robust framework for planning, establishing, implementing, operating, monitoring, reviewing, maintaining, and continually improving business continuity measures across Infosys and its subsidiaries. Apart from Phoenix plan at the corporate level, comprehensive business continuity plans are created at three operational levels covering business functions, locations, and accounts. Integrated into our Enterprise Risk Management Framework, the BCMS plans guide our typical response to events, such as catastrophes and natural or human-made disasters, which could disrupt or severely constrain our operations. This covers various crisis scenarios as part of detailed risk assessments (at functions, locations, and accounts level), which are documented with mitigation plans along with controls put in place. The management system has been continuously validated across levels through tests and exercises, and various incidents have been successfully tackled without significant business continuity or employee safety impacts. An efficient business continuity management policy has enabled us to maintain status quo during disasters.

We, at Infosys, have participated in many of these discussions and workshops conducted by the MeitY and industry bodies. This enabled us to gather valuable insights and provide inputs to the authorities, which will play a crucial role in drafting the final regulations. • Infosys hosted its first in-person Privacy Symposium at its Bengaluru campus, which was attended by a large number of industry experts, academicians, and civil society representatives. Senior officials from Government delivered the keynote address and moderated one of the panel discussions on the implementation of the DPDP Act. This event was a significant step towards collaboration between government and industry in working out the implementation aspects of the DPDP Act.
